## DuraPlay, Inc. Environmental Policy

As stewards of the environment, DuraPlay, Inc. has adopted sustainable business strategies and practices.

We use locally sourced manufacturers and suppliers at each job site when possible, reducing the use of fossil fuel and lowering the impact of our footprint. Our commitment to using 45% - 85% post-consumer and industrial rubber holds true on every job decreasing the impact resulting from the processing of virgin materials.

We constantly strive to find new ways to reduce, reuse and practice sustainability not only in business but in our personal lives as well.
